# Meeting Agenda

Group meeting for group GoAyo.

## §1 Objectives

- Create tasks for the new codesprint
  - Which new User Stories will be created?
  - Any “Non-tasks”, ie, refactoring?
- Discuss restructuring RAD.
- Discuss SDD and how and who will work it.

## §2 Reports

- No assignments were made over the weekend.

## §3 Discussion Items

- What has to be done on the RAD?
- What has to be done on the SDD?
- Will we take any new user stories for this week's codesprint or just work the backlog and refactor for the deadline on friday?
- Which pair will be assigned which task? What will be assigned to the scrummaster?

## §4 Outcomes and Assignments

- What has to be done on the RAD?
  - The “as a developer” tasks will be scrubbed as they are incorrectly formatted. This will be done immediately during this meeting.
  - Non-functionality criteria has to be added. If one group is doing well mid week, that group can add this to the doc. Otherwise we will do it together on thursday.
- What has to be done on the SDD?
  - This will be added and discussed on Thursday or Friday, on campus.
- Will we take any new user stories for this week's codesprint or just work the backlog and refactor for the deadline on friday?

- We will take on US02 and US03 related to adding a new user or logging a user in.
  - We will refactor the mock database to better model a real database.
  - We will take on US10 to add personal contacts for a user.
- Which pair will be assigned which task? What will be assigned to the scrummaster?
  - Oscar and Olof will refactor the mock database and implement US02 and US03
  - Yenan and Alex will work on documentation for xml files, and work the backlog of unfinished tasks from previous weeks.
  - Gabriel will take on US10.
  - Gabriel will try updating the UML.

## **§5 End of Meeting**

- Next meeting will be on Thursday 13:15. This will be on campus.
  - We will meet up with Pelle, create the SDD and finish the RAD changes.
