

Facilitator: Gabriel Brattgård
Participants: Olof Sjögren, Oscar Sanner, Alex Phu, Yen-an Wang
Location: Online Zoom
Date: 18-09-20

Meeting Agenda

Group meeting for group GoAyo.

§1 Objectives

- Week summary and reflection. Was the codesprint layout good for us?
- Decide roles for the next week's codesprint

§2 Reports

- The two coding pairs (Yen-an & Gabriel, Olof & Alex) could not finish their tasks for this week much due to the connection between backend and GUI not being properly figured out.

§3 Discussion Items

- What are the roles for next week?
- Can we develop the role of the Scrum Master?
- How should we balance between backend vs GUI?

§4 Outcomes and Assignments

- Coding pairs for next week will be Yen-an & Gabriel, Oscar & Alex. Olof will be scrum master.
- We decided to start fresh with a new codesprint on Monday. User stories not completed this week will be moved into the backlog of next codesprint.
- The Scrum Master will have delegated tasks but when these are resolved he can join the coding pair with most issues for the rest of the codesprint.
- The Controller will be crucial in the coming codesprint to glue everything together for proper testing and evaluation.
- We decided to implement an "Active Model" for the Model-View-Controller. See here for reference:
<https://medium.com/upday-devs/android-architecture-patterns-part-1-model-view-controller-3baecef5f2b6>

§5 End of Meeting

- Next meeting will be on Monday 15:15 21/09 -20 over Zoom. Goal will be to plan out the codesprint.
