Location: Campus Johanneberg
Date: 2020-09-25

Meeting Agenda

Group meeting for group GoAyo.

§1 Objectives

- Figure out a way to apply MVVM to our project

§2 Reports

- The ViewModel code architecture has been analysed and is currently work in process so that it can be applied to our project
 - Oscar, Alex & Olof have started coding on ViewModel
 - We are trying to create a MVVM structure in our project
- Gabriel & Yen-an has finished the prototype for functionalities involving debt-management.
- The rudimentary application is now complete
 - Various refactoring still required in the future
 - Their majority of the Views has been created but ViewModel is still under development
 - It is non-functional as the connections between each components in the application are still yet to be implemented
