

Facilitator: Olof Sjögren
Participants: Gabriel Brattgård, Oscar Sanner, Olof Sjögren, Alex Phu, Yenan Wang
Location: Online Zoom
Date: 21-09-2020

Meeting Agenda

Group meeting for group GoAyo.

§1 Objectives

- Set up a new Code Sprint
- Design
- Discuss next iteration and UML

§2 Reports

- Since last Code Sprints objective were not completed, this week's Code Sprint will include the uncompleted items.
- Started working on the graphical design using Figma. Main pages are completed.

§3 Discussion Items

- Model package is progressing nicely but still lacks some functionality.
- Creation of user interface.
- Overall user- & graphical interface design.
- MVC structure.

§4 Outcomes and Assignments

- Decided that last week's Code Sprints will be worked on this week as well.
- In case all user stories should be completed, work should be focused on next iterations and further Design models.
- Olof will create a common Controller package and both programming pairs will implement their own controllers as needed. Olof will then connect the controllers through a main aggregate Controller.
- Olof will work further on the design as well as create specific Exceptions for error handling.
- Alex & Oscar will finish up Account model logic and then start working on views and necessary controller classes connected to their currently assigned User Stories.
- Yenan & Gabriel will double check the tests and also start working views and controllers connected to their assigned User Stories.
- The thought of expanding the MockDatabase with proper documentation for exact testing capabilities.

- Discussed different MVC-structures. Found a couple of implementations of MVC-structure specific to android applications.
 - <https://medium.com/upday-devs/android-architecture-patterns-part-1-model-view-controller-3baecef5f2b6>
 - <https://github.com/n00dlEs/android-mvc-sample>

§5 End of Meeting

- Next meeting will be held on Thursday (24/21) at 13:15.
